

NEXOLVE
TECHNOLOGIES

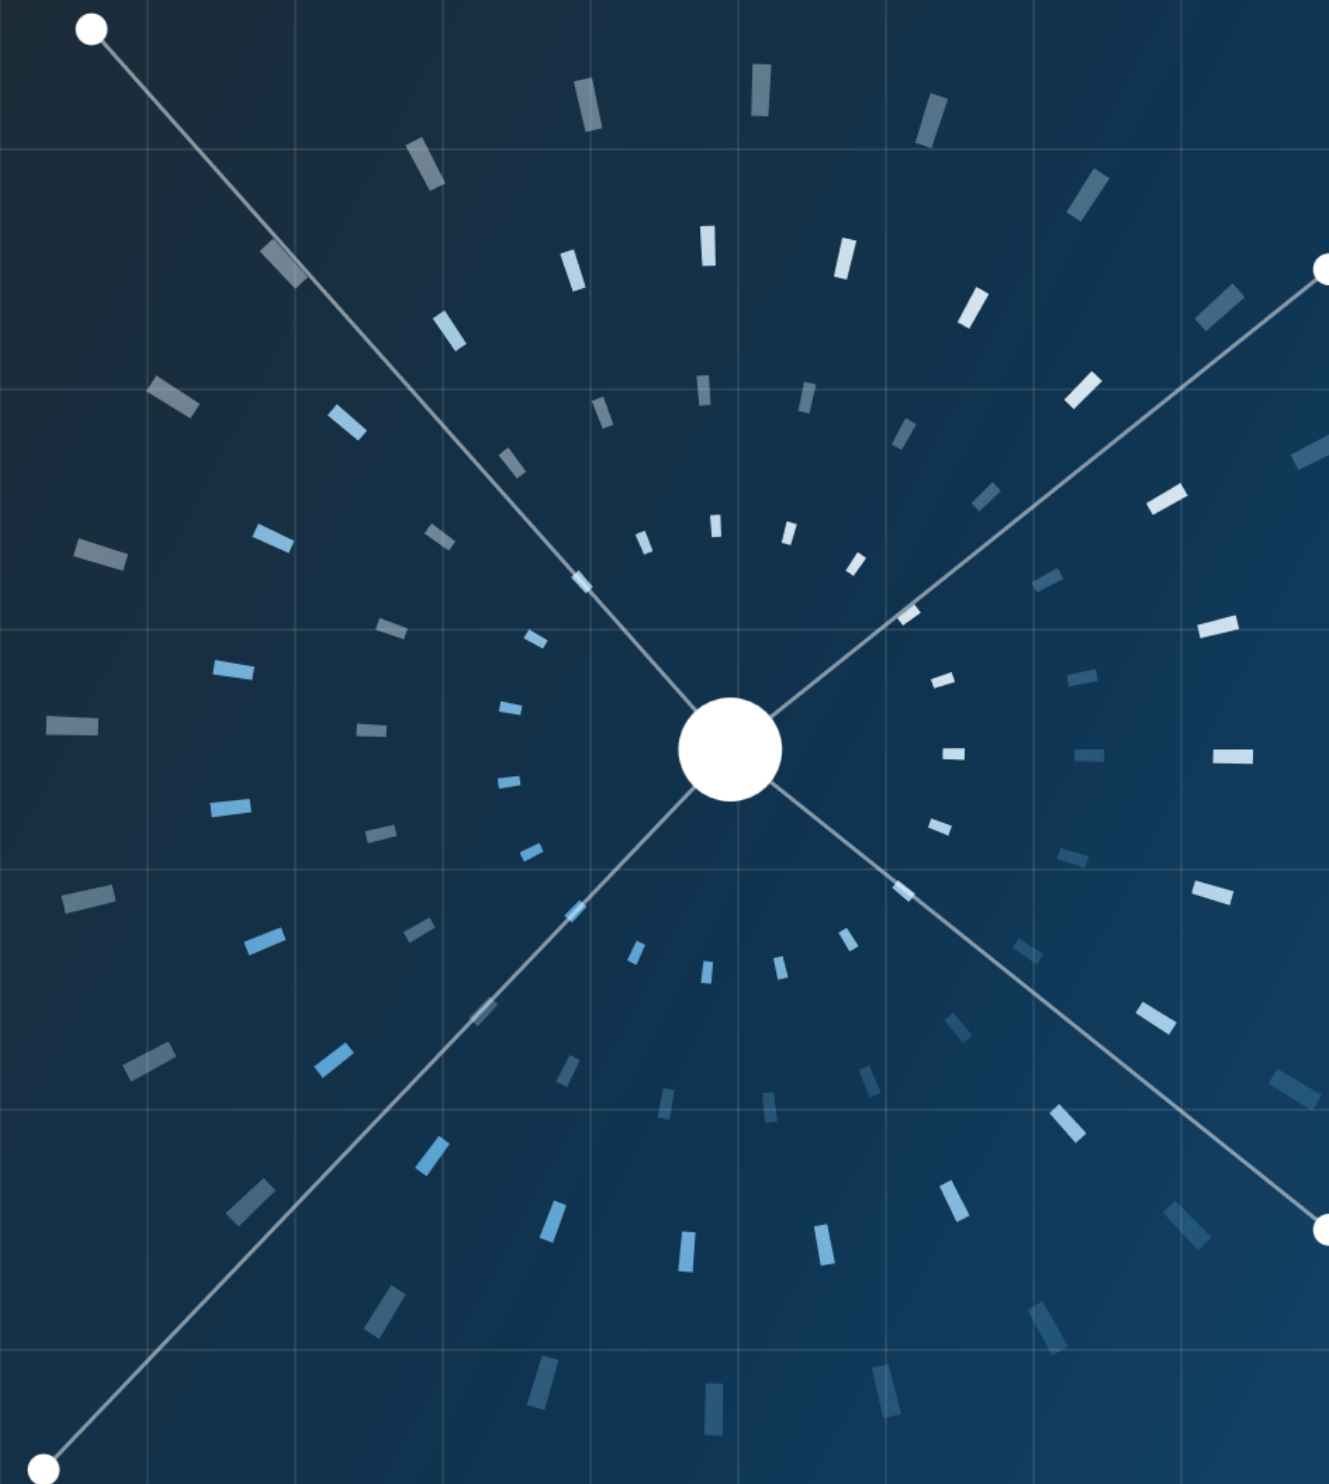

Company Profile

Supply chain and procurement transformation, delivered on SAP, Coupa and Oracle — with the integration, analytics and software engineering that connect everything together.

2026

APAC & MIDDLE EAST

EST. 2024

POSITIONING

We fix how large organisations **buy, source and move goods** — then we build the technology that keeps it running.

CONSULT

Category strategy, process design, operating model

IMPLEMENT

SAP, Coupa and Oracle platforms, end to end

INTEGRATE

APIs, OpenText, analytics and reporting

BUILD

Custom software, portals and web platforms

Three parts

Who we are, what we do, and the evidence behind both.

01	The Firm Who we are, where the experience comes from, and the sectors we have delivered in	
02	The Offering Five service lines, the platform landscape we work across, and how we engage	
03	The Proof Programmes delivered, customers, alliance network and accreditations	

01

The Firm

Built on delivery, not on a pitch deck — 15+ enterprise programmes across APAC and the Middle East.

WHO WE ARE

A consulting firm with an engineering bench

We specialise in procurement and supply chain transformation — designing how organisations source, buy and pay, then implementing the platforms and integrations that run it.

Founded in 2024 out of years of hands-on delivery with leading consulting firms and large enterprises, our team has been part of 15+ enterprise programmes spanning sourcing, contracts, supplier management, P2P, ERP integration and analytics.

That combination — process credibility plus platform and software engineering under one roof — is what lets us own an outcome rather than a work package.

15+

ENTERPRISE PROGRAMMES

24+

YEARS COMBINED DELIVERY

9

PLATFORMS & MODULES

2

DELIVERY REGIONS

Where our experience sits

Sector context shapes every sourcing decision. Ours spans six, from high-velocity FMCG to capital-heavy energy.

FMCG

High-volume supplier networks, fast catalogue turnover, tight working capital

Oil & Gas

Contract-heavy sourcing under strict compliance and audit regimes

Retail

Long supplier tails, commerce automation and omnichannel replenishment

Banking

Third-party risk, governance and vendor lifecycle at the centre

Energy & Mining

Capital projects, complex category structures and long lead times

Manufacturing

Direct materials, multi-entity rollouts and shared service models

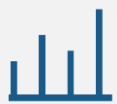

02

The Offering

Advisory, platform delivery, integration and software engineering — one accountable team.

Five lines, one accountable team

Most engagements start in one line and pull in the next two within a quarter.

01

Supply Chain & Procurement Consulting

- Category strategy & strategic sourcing
- Process and operating-model design
- Spend and savings baselining

02

Source-to-Pay Platform Delivery

- SAP Ariba full suite
- Coupa
- Oracle
- SAP Fieldglass
- Commerce Automation

03

ERP & Core SAP

- S/4HANA and ECC,
- Master data and migration
- SAP Joule AI enablement

04

Data & Analytics, Integrations

- API and middleware integration
- OpenText document
- SAP Analytics Cloud & reporting

05

Software & Digital Engineering

- Supplier and internal portals
- Web platforms and websites
- Managed support and QA

BAR DEPTH INDICATES RELATIVE CAPABILITY DEPTH

The full source-to-pay chain

Four stages, one platform. Most competitors stop after stage two.

 01 Upstream • Sourcing & Guided Sourcing • Contracts & Clause Libraries • Supplier Lifecycle & Performance • Supplier Risk	 02 Downstream • Buying & Invoicing (P2P) • Catalogues & Punchout • Commerce Automation via DSN • Supplier Onboarding at scale	 03 Integration • S/4HANA and ECC • Non-SAP ERP and third parties • Ariba APIs and CI upgrades • DocuSign, OpenText, e-signature	 04 Adoption • QA for large-scale programmes • Change management & training • Reporting and adoption metrics • Continuous optimisation
--	--	---	---

The stack we work across

Four layers, from the source-to-pay platform down to the integration fabric.

LAYER 01
Source to Pay

SAP Ariba

Coupa

Oracle Procurement

SAP Fieldglass

LAYER 02
Core ERP

SAP S/4HANA

SAP ECC

SAP MM & SD

Master Data Governance

LAYER 03
Intelligence

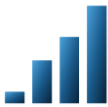

SAP Joule AI

SAP Analytics Cloud

SpendConsole

Custom Reporting

LAYER 04
Integration & Build

OpenText

DocuSign

REST & SOAP APIs

Web & Portals

Our delivery sequence

Each phase closes with something the client owns, not a status report.

01

Assess

Current-state review, spend baseline and platform readiness

**OUTPUT ·
DIAGNOSTIC**

02

Design

Process, category and integration design signed off by the business

**OUTPUT ·
BLUEPRINT**

03

Deploy

Configuration, integration build and quality assurance

**OUTPUT · LIVE
SYSTEM**

04

Enable

Supplier onboarding, change management and user training

**OUTPUT ·
ADOPTION**

05

Optimise

Automation, analytics and continuous improvement

**OUTPUT · MEASURED
VALUE**

03

The Proof

Enterprise programmes, an alliance network
and the accreditations behind them.

Enterprises we have delivered for

Key engagements from years of global consulting work.

 CONGLOMERATE	 OIL & GAS	 PACKAGING	 RETAIL
 MINING	 BEVERAGES	 IT SERVICES	 FMCG
15+ ARIBA PROJECTS DELIVERED		COVERAGE Implementation, enablement and ongoing optimisation under one team.	

ALLIANCE NETWORK

We scale through partnership

Joint delivery with established systems integrators and advisory firms — we bring platform depth, they bring scale, the client gets one plan.

Systems Limited

Joint delivery on large-scale SAP programmes across Pakistan and the Gulf

EY

Procurement transformation workstreams alongside advisory engagements

Bloom Consulting

Co-delivery of sourcing and supplier enablement programmes

Integration Xperts

Middleware and API integration capacity for complex landscapes

TECHNOLOGY ALLIANCE SpendConsole

Spend analytics delivered alongside our platform work

ACCREDITATION PSEB registered

Pakistan Software Export Board — export-ready standing

Four reasons teams bring us in

Process and platform in one team

Consultants who can redesign the process and configure the system that runs it — no handoff, no translation loss.

Enterprise-grade delivery experience

Our people came from the consulting firms and enterprise teams that ran these programmes at scale.

Platform-agnostic advice

Deepest in SAP Ariba, fluent in Coupa and Oracle — so the recommendation follows the requirement, not a licence.

Measured on value, not documents

Efficiency, compliance and agility in live operations — with adoption metrics we agree before we start.
